

# Mechanisms underlying Memory Storage and Pathological Learning (MMPL)

Satellite of the 12<sup>th</sup> Colloquium of the French Neuroscience Society

This one-day scientific symposium includes a line-up of **internationally renowned speakers** at the forefront of the field of learning and memory. The main aim of the event is to promote the presentation and discussion of cutting-edge research, covering the most recent **molecular, cellular, circuit and behavioral studies of memory** in both physiological and pathological contexts.

**Interaction between speakers and attendees** will be highly promoted, thus fostering cooperation and networking among laboratories at the international level. Therefore, a **poster session** (lunch provided) will be organized in order to encourage fruitful exchanges. All in all, scientists will have a **great opportunity** to discuss their work in a relaxed and informal atmosphere.

8:30-9:00	<b>Welcome</b>
9:00-9:10	<b>Welcome Speech and Opening Remarks</b>
9:10-10:30	<b>Morning Session I</b> 9:10-9:50 Pico Caroni (Switzerland) 9:50-10:30 Mauro Costa-Mattioli (USA)
10:30-11:00	<b>Coffee Break</b>
11:00-12:50	<b>Morning Session II</b> 11:00-11:40 TBA 11:40-11:55 Selected abstract #1 11:55-12:35 Seth Grant (UK) 12:35-12:50 Selected abstract #2
12:50-14:30	<b>Lunch &amp; Poster Session</b>
14:30-17:15	<b>Afternoon Session</b> 14:30-15:10 Cyril Herry (France) 15:10-15:40 Christian Lüscher (Switzerland) 15:40-15:55 Selected abstract #3 15:55-16:35 Karim Nader (Canada) 16:35-17:15 Emmanuel Valjent (France)
17:15-17:30	<b>Closing Remarks</b>
